(It may be here mentioned that the Marquis of Hertford appears in several of Trollope's novels as the Duke of Omni-In the same manner Lady Mont-

fort, as will be presently shown, represents more than one lady, perhaps three, who have more or less influenced the politics of England, and especially the political career of Benjamin D'Israeli,

It is therefore only incidentally that persons are more or less indicated in this novel, and what is evidently its real primary motive is to shadow forth rather than to portray the political career of the author, showing how he was helped and how he was hindered by persons and circumstances with whom and which he came in contact.

"Endymion," then, is the author's theory of his own career, and it will interest intelligent readers more as a study of D'Israeli than as a study of a literary work. His career is adumbrated in that of his hero Endymion Ferrars; not that Endymion in person and history is identical with his author. His very birth, for instance, is quite different. Endymion is the son of a tory statesman who commits suicide because, having lived too fast when in office, he is ruined when his party goes out; while D'Israeli was the son of a well-to-do Hebrew litterateur who died respectably in his bed. It is only the main incidents affecting his political career that we are to seek whatever there may be in the book of narrative founded on fact.

As he makes his sister Myra early in the novel predict that he will owe much of his success to the influence of women, we will make our first observations on the women of the

The two females most influential in promoting Endymion's career are his sister Myra and Lady Montfort, both of whom at different stages of their lives personate different ladies of actual life, or rather the influences of different ladies on the career of Endymion's antitype. Myra, the sister of Endymion, un-

D'Israell, a sister of the author two years older than her brother, who was devotedly attached to him and traveled with him in early life, and who doubtlessly exercised much influence over him. But she soon takes position in another character. Myra marries the Lord Roehampton of the novel, who undoubtedly represents the Lord Palmerston of real life, and certainly after this event the role she plays as the social leader of a party is very similar to that of Lady Palmerston when she presided at the grand doings of Cambridge House. We are unable to say whether Lady Palmerston did or did not exercise any influence in favor of D'Israeli. At the time when he and Palmerston were both prominent in politics, they belonged Lord Palmerston better than he ments may make room for them. liked any other whig; and when there was a split in the whig party, D'Israeli frequently sided with

When Myra, having become a widow, takes for her second husband the Prince Florestan, who ings, being well aware that whatepresents the Prince Louis Napoleon, afterwards emperor of the French, she passes from our consideration as influencing the career of Endymion D'Israeli.

If anyone desires to get a glimpse of the actual Lady Blessington and her management of her poodles, he will find a most amusing picture of it in the Life of Charles Matthews, the actor, written, or as he modestly terms it, edited by Charles Dickens. We there see my lord and lady traveling together in Italy with Count D'Orsay and young Mathews in their train, the former in the ambiguous capacity, recognized in Italy, of cavaliere serviente, and Charles as my lord's architect, but both petted, patted and pampered by my lady as poodle and deputy poodle. You may there see the two poodles sometimes fondling on their mistress, sometimes snapping and snarling on one another, sometimes getting a curse and almost a kick from my lord, while all asperities are tenderly smoothed over by my

lady. It was after all this, however, the next congress, when they exthat D'Israeli postured as poodle to her ladyship. My lord was dead and my lady was the brilliant occupant of Gore House, Kensington Count D'Orsay was no longer poodle, but lord and master of the establishment, though never married to her ladyship. She was not herself in society, but she enabled him doubtedly represents Miss Sarah at least to become accustomed to the company and manners of aristocratic people of his own sex, an advantage of which he was not slow to avail himself. The Blessington days are therefore carefully veiled in the novel, though the character of her ladyship is manifested as far as was discreet in that of Lady Montfort. She, in fact, is a miti-

gated Lady Blessington. We have insensibly passed our limits without noticing how the heroe's career is influenced by money supplied by his friends the Neufchatels (Rothschilds), and by political influence at the hands of Sidney Wilton and Lord Roehampton (Sidney Herbert and Lord Palmerston). THE SENATORSHIP

ever we may say on the subject will be looked upon as inspired by the senator himself. Erroneous as this conception is, it undoubtedly would act as a bar to the candid consideration of what we might present. But as this is our last appearance before the meeting of the general assembly, this much: There is no man in the state who does not tacitly admit that Col. Bailey, apart from recent objections, is the man to represent the then come in the objections; and what do they amount to? That Col. Bailey came forward like a man with the expression of his opinions during our late canvass, and gave his constituents the counsel which they had a right to expect from him, while those who hope to rise by his fall kept mum and had

We are aware that our low-tax may present, but we will hazard the tion of their large stock of choice following: If a democrat is to be elected at all, he must be either lowtax, state-credit or one of the mum andidates. Would it be reasonable, after the decisive verdict of the people pronounced at the last election. to put forward one of the low-tax leaders? Would it be consistent with the principles of the low-tax men themselves, who contend that the mum candidates, whose claim sion, and have decided to make a is that they have not principle enough or parriotism enough to contend for what they deem right. Surely they are not the men. Then, if the deliberate judgment of the people points to a state-credit man, what excuse is there for putting a man in whose abilities as a legislator have never been put to the test, in preference over one whose counsels bear authority in his own party

IN CONGRESS.

Some very important measures in practical legislation are now before congress. What is commonly called Burnside's bill, but would be more justly designated as Bailey's bill, passed the senate last Friday week, the 17th inst. It provides that the proceeds of the sale of public lands shall hereafter be invested in United States bonds and be held as an educational fund for the United States, the annual interest to be distributed among the several states of the population, for educational puras chairman of the senate committee ing respectively Lady Blessington, on education and labor, took a principal share in the work and responsibility of framing this bill, though that the Count of Ferrol, like so he yielded the office of reporting it many characters in this novel, to the senate to Senator Burnside. Senator Bailey, however, gave the ate, meeting objections and making pose after Christmas to make a critical examination of this bill, which is only one of several efforts made ment of general education.

Senators Beck and Kernan again propose to make a vigorous effort, before the expiration of the present congress, to repeal our present unjust and impolitic shipping laws, by which foreign-built ships, even if

our harbors as foreign bottoms. The joint rule for making the electoral count in presidential elections is again hanging fire, being ndustriously impeded by the republican membes. In general terms it policy to obstruct legislation during the remaining session of the present congress, preferring to do it all in pect to hold the control of at least more their own way.
